HealthyBlue – Select Generics at \$0

You now have access to select generic prescriptions to help you manage a health condition, while saving money. That's because there is no additional cost to you, even if you haven't met your deductible for certain generic drugs related to:

- Asthma
- Depression
- Diabetes
- High blood pressure
- High cholesterol

But remember in order to get these prescriptions at no additional cost, it must be a generic drug.

To ensure you're paying the lowest amount or \$0 for a prescription, you should check the status of the select preventive generic drugs listed on the preferred drug list that can find online at www.carefirst.com/HealthyBlue. If there is a generic equivalent on the CareFirst BlueChoice preferred list, talk with your doctor to see if a generic alternative is the right choice for you.

Go to www.carefirst.com/healthyblue to see if you can get select generics for \$0.

The following is a list of drugs that CareFirst's Pharmacy Management team has categorized as generic preventive and are not subject to the deductible and has a \$0 copay.

This list does not guarantee coverage. Check your benefit materials for the terms of your prescription drug coverage. This list may not be all inclusive. A copy of the current Select Generics List is available to the Member upon request.
