

2003 DRUG FEE SCHEDULE

Listed below are the Medicare fees for drugs that are based on the Average Wholesale Price (AWP). As explained in Program Memorandum (PM) AB-02-174, Change Request 2381, the Centers for Medicare and Medicaid Services (CMS) have established a single, national price for most drugs. Note, that each Medicare carrier determines coverage.

HCPCS	95% of AWP Effective 1/1/03	95% of AWP Effective 4/1/03	95% of AWP Effective 7/1/03

#Non-covered as the contractor has determined them to be self-administered drugs. See Self-Administered Drugs under "Drugs and Biologicals" on the contractor website, <http://www.marylandmedicare.com/>.

The presence or absence of a particular drug on the Single Drug Pricer (SDP) file does not represent a determination that the Medicare program either covers or does not cover that drug. The amounts shown on the SDP file indicate the maximum Medicare payment allowance, if the Medicare contractor determines that the drug meets the program's requirements for coverage. Similarly, the absence of a particular drug from the SDP file means that if the Medicare contractor determines that the drug is covered by Medicare, the local contractor must then determine the program's payment allowance by applying the program's standard drug payment policy rules. Medicare contractors separately determine whether a particular drug meets the program's general requirements for coverage and if so, whether payment may be made for the drug in the particular circumstance under which it was furnished. Examples of this latter determination include, but are not limited to, determinations as to whether a particular drug and route of administration are reasonable and necessary to treat the beneficiary's condition, whether a drug may be excluded from payment because it is usually self-administered, and whether a least costly alternative to the drug exists.
