

Standard Paper Remittance (SPR) Advice – August 6, 2003

No changes are being made to the SPR format in conjunction with HIPAA implementation, but the FISS standard system must use the version 4010A1 flat file, rather than any earlier flat file to generate SPRs to avoid data variations between SPRs and ERAs (Electronic Remittance Advice) in fields shared by both formats. As of September 1, 2003 all SPRs will be created using the new 4010A1 flat file. This change should be transparent to users.
