

DATE: April 2, 2004

TO: All Teaching Hospitals

FROM: Medicare Audit & Reimbursement

SUBJECT: Intern and Resident Information System (IRIS) Edit Program--
ACTION

Attached are two files for Version 1.1 of the IRISEDV3 program. These files are for upgrading Version 1.0 of IRISEDV3 or for installing Version 1.1. The "readme.doc" file contains installation instructions, and the "edv3inst.ex" file is for installation of Version 1.1. This upgrade is the result of FI and provider input for the correction of screen messages and hard copy reports in Version 1.0.

The program installation requires an IRISEDV3 diskette. Create this diskette by copying the attached files and follow the instructions as stated in the "**READ ME FIRST FILE (README.DOC) – IMPORTANT INFORMATION FOR USING THE IRISEDV3 DISKETTE:**" before using the diskette.

Providers are to use Version 1.1 on IRIS diskettes for cost reporting periods ending after December 31, 2003, reports. This information is being made available via electronic transmission to each teaching hospital prior to **Friday, May 14 2002**. Each hospital should read and follow IRISEDV3 program installation instructions on their file copy (readme.doc) before using IRISEDV3 on IRIS diskettes for cost reporting periods ending after December 31, 2003.

Providers should contact Mr. Richard Fleddermann at 410-786-6300 if they have technical questions for operating IRISEDV3.

Providers may contact Mr. Milton Jacobson at 410-786-7553 if they have non-technical questions and other issues involving IRISEDV3.
