Our Mission

In accordance with the Charter of the nonprofit health service plan, the mission of CareFirst BlueCross BlueShield shall be to:

• Provide affordable and accessible health insurance to the plan’s insured and those persons insured or issued health benefit plans by affiliates or subsidiaries of the plan.

• Assist and support public and private health care initiatives for individuals without health insurance.

• Promote the integration of a health care system that meets the health care needs of all the residents of the jurisdictions in which the nonprofit health system service plan operates.
CareFirst BlueCross BlueShield (CareFirst) is a unique organization in the region we serve – all of Maryland, Washington, DC and portions of Northern Virginia. We are by far the largest health insurer serving the area, with nearly 3.2 million residents relying on CareFirst for their health care coverage. In addition, we have a specific mission that calls on us to make coverage affordable and accessible, to work in partnership on public and private health initiatives, and promote health system improvements that help meet the needs of the community. But just what does that mean from a practical standpoint?

It means that unlike any other health insurer with which we compete, we have an obligation to develop and advance big ideas – programs and partnerships designed to improve the quality of health care and the quality of life in the communities we serve. At the same time, with more than seven decades of serving the region, we have deep community roots that uniquely position us to work closely with organizations on the frontline of so many important health issues.

No other company in the area is more committed to partnering with community and philanthropic organizations. Importantly, we focus our giving and financial support heavily on programs and organizations that share our commitment to meeting unmet health care needs, creating broader access to health care and advancing innovations that will produce sustainable, positive impact on health care delivery. It represents a steadfast commitment to the people and communities we serve.

Beyond our community investments, we strive to be aware of and support the social well-being of the communities we serve. To that end, CareFirst embraces diversity and inclusion, provides opportunities for our employees to volunteer in the community, and looks for innovative ways to be a socially responsible member of the corporate community.

While this report only scratches the surface, please take the time to learn about what CareFirst – with the support of so many other organizations and individuals – is doing to foster and support big ideas that make our communities stronger.
Community Roots:

Strong, Deep & Growing

Our roots run deep in the communities we serve, where the organizations that grew to become CareFirst have taken hold over more than 7 decades of service. Over the years, that commitment has grown to be so much more than a business presence.

Almost every year, CareFirst ranks at or near the top of listings of the most charitable corporate philanthropists in the region. While we are proud of that distinction, we are prouder still to focus our charitable and community investments on programs that are consistent with and that advance our mission to give more people access to better health care. In the last decade, CareFirst has devoted nearly half a billion dollars to worthwhile programs and organizations.

CareFirst works to maximize the impact of its contributions by focusing those dollars on health needs and programs that will take root and grow to benefit the residents of our region for years to come.
HEALTH CARE FOR THE HOMELESS

Mark Grady – here with dentist Thomas Stack, DDS – has been getting all of his dental and health care at Baltimore’s Health Care for the Homeless (HCH) for “quite a few years.” CareFirst has a long history of supporting HCH’s mission of meeting the health care needs of homeless patients in the city and in other communities around the region.
Healthy beginnings are critical to long, healthy lives. Unfortunately for too many in our region, a variety of health challenges can begin in the womb and carry through to early childhood. Helping mothers take the first steps to a healthy start during pregnancy and getting them the care, tools and knowledge needed to extend that start through early childhood are at the heart of CareFirst's efforts to support programs that improve maternal and child health.

Since 2008, CareFirst has committed nearly $18 million to programs that aim to improve maternal and child health. These programs have taken all shapes and sizes, from efforts that provide safe cribs to facilitate safe sleep, to mental health programs to address behavioral challenges confronting expecting mothers. While great strides have been made in reducing infant mortality in our area – particularly in urban Baltimore and Washington, DC – more remains to be done.

In 2014, CareFirst announced a program through which organizations in Maryland, Northern Virginia and Washington, DC could apply for grant funding for programs to improve birth outcomes and reduce infant mortality. From 2015 through 2017, seven organizations will share $3.1 million in funding for programs focusing on expecting mothers and early childhood health.

**CCI Health & Wellness**
$748,506 to expand its prenatal care services in Prince George’s County, Md.

**Community of Hope**
$615,000 to improve the poor birth outcomes in Ward 8 of the District of Columbia.

**Northern Virginia Family Service**
$564,301 for its perinatal maternal mental health initiative in Alexandria, Arlington and Fairfax.

**Access to Wholistic & Productive Living Institute**
$447,612 to expand the Bright Beginnings program, a home-visiting program in Prince George’s County.

**Mary’s Center**
$376,693 to boost prenatal care in Prince George’s County and the District’s Ward 4.

**MedStar Washington Hospital Center**
$262,311 to support reproductive health care and psychosocial services for pregnant and parenting youth in the District’s Ward 8.

**SCAN of Northern Virginia**
$85,778 to purchase cribs and increase safe sleep education for its Operation Safe Babies program in Alexandria, Arlington and Fairfax.

With centers in Washington, DC, Montgomery County and Prince George’s County, Mary’s Center and staffers such as Mindy Greenside help expectant mothers such as Roxana Juarez prepare for birth and motherhood. Prenatal health offerings are among the many services offered by Mary’s Center.
Supporting Healthy Starts for Mothers & Children

Improving the health of our region’s mothers and children is critical. The United States has one of the highest infant mortality rates in the developed world, and CareFirst is committed to fighting this silent epidemic.

Addressing Maternal Health from Every Angle

Over the years, CareFirst has a strong history of supporting maternal and child health programs that seek to address these issues through a variety of approaches, including:

- Safe sleep habits
- Smoking and substance use cessation
- Prenatal care
- Spacing between pregnancies
- Breastfeeding
- Treatment of maternal depression
- Maternal obesity prevention

Big Ideas: B’More for Healthy Babies (BHB)

B’more for Healthy Babies has provided assistance to low income parents—often with limited education and a lack of access to high quality medical care—to improve infant mortality rates and health outcomes in Baltimore.

In 2009, Baltimore had the nation’s fourth-highest infant mortality rate—13.5 out of every 1,000 live births. In 2015, the rate fell to 8.4 per 1,000 live births—a 38 percent drop reflecting 185 fewer babies losing their lives prematurely.

38%
185 fewer infant deaths

$8.9 million
CareFirst’s 10-year commitment in BHB.

A Strong Partner for Healthy Beginnings

Since 2008, CareFirst has allocated nearly $18 million to support maternal & child health.

In the last two years, CareFirst maternal health programs reached more than 19,000 mothers and children.

CareFirst.com/community | 5
Underserved communities, including those insured through Medicaid, still face challenges in accessing care. Many of these people rely heavily on the 195 community health centers in Maryland, Northern Virginia and the District of Columbia. These centers are the backbone of what is often called the “safety net” health system that serves those with limited options for care. With its mission to expand access to health care, CareFirst has made supporting these critical care givers a focus of its community efforts.

These vital community health centers often serve sick and more socio-economically disadvantaged patients. They often count among their patients individuals with multiple chronic conditions and other health needs that could greatly benefit from consistent, coordinated care. One way CareFirst is helping safety net clinics improve access to care is using telemedicine. Telemedicine is a valuable tool that can improve efficiency, remove barriers to accessing health care, promote communication between and among health care providers, and reduce health care costs.

Since 2014, CareFirst has invested nearly $4 million in telemedicine initiatives. In 2016, CareFirst awarded $3 million, funded over three years, to help eight safety net health programs throughout Washington, DC, Virginia and Maryland expand access to health care to underserved communities through the use of telemedicine.

2016 Telemedicine Grant Recipients
- Cornerstone Montgomery
- George Washington University Medical Faculty Practice
- Mosaic Community Services
- Queen Anne’s County Department of Health
- The Medical Society of Northern Virginia Foundation
- University of Maryland Baltimore Foundation
- Virginia Hospital Center Foundation
- Western Maryland Health System

Since 2014, CareFirst has invested nearly $4 million in telemedicine initiatives.
INCREASING ACCESS TO MEET COMMUNITY HEALTH NEEDS

In addition to helping safety net clinics adapt the medical home model to meet their patients’ needs, CareFirst continues to commit significant funding to help more people access specific health care services through community health care providers. Here’s a look at some specific areas of safety net support in the last two years.

INCREASING ACCESS TO MEET COMMUNITY HEALTH NEEDS

Underserved populations rely more on community health centers—also sometimes known as safety net clinics. Safety net health centers provide care to more than 626,000 patients in Washington, DC, Maryland and Northern Virginia. Nationwide, safety net clinics save about $24 billion annually by reducing the costs of emergency visits, hospital stays and specialty care.

A DEEP COMMITMENT TO COMMUNITY-BASED HEALTH CARE

$34 MILLION

Since 2006 CareFirst has committed $34 million to a wide variety of safety net health initiatives to improve the quality of and access to community-based care.

$9 MILLION

In just the last two years (2015-2016) CareFirst has committed $9 million to support safety net clinics, servicing 176,749 people.

$4 MILLION

CareFirst invested $4 million in telemedicine initiatives that expanded access to care for underserved communities throughout the CareFirst region.

QUICK TAKE

Supporting Care for Vulnerable Populations

Invested $415,000 in dental services for more than 5,556 residents in the region.

CareFirst support has helped more than 119,000 residents access needed primary care services.

More than 8,000 residents have benefitted from specific support for community organizations focused on cancer prevention and awareness.
The nation – as well as the Mid-Atlantic Region that CareFirst serves – faces a critical shortage of bedside nurses that is expected to worsen with the aging of the Baby Boom generation. And, with an increasing number of Americans insured by the Affordable Care Act and a growing reliance on nurses as primary health care givers and care managers, the need for a robust new generation of nurses has never been more acute.

That’s why CareFirst has developed and supported community-based programs and partnerships designed to support nurses in training and bolster the ranks of nursing faculty to increase nursing school capacity.

While CareFirst has supported programs on multiple nursing fronts (take a quick look on the opposite page), Project RN has been at the heart of those efforts. Project RN was launched in 2007 to address one central issue affecting the training of nurses – a lack of qualified teachers at the nation’s nursing schools. Research indicated that many nurses contemplating teaching careers faced financial obstacles that prevented them from completing the degree necessary to head into the classroom.

Since 2007, CareFirst has committed $3.3 million in Project RN grants to provide students at nursing schools in the region with $80,000 stipends over two years to complete their graduate degrees. The stipends could be used for living costs, tuition, books and other school-related expenses. In exchange, the students committed to teach nursing in the region for three years after completion of their degrees.

Using conservative assumptions, Project RN recipients will help train more than 11,600 nurses in the region during their three-year teaching commitments – and potentially many more during their careers.

**Universities Receiving Project RN Grants**

- Bowie State University
- Catholic University
- Coppin State University
- Georgetown University
- George Mason University
- George Washington University
- Howard University
- Johns Hopkins University
- Marymount University
- Morgan State University
- Notre Dame of Maryland University
- Salisbury University
- Stevenson University
- Towson University
- University of Maryland

Sedonna Brown used her CareFirst Project RN award to complete a Masters degree in nursing at Bowie State University in 2013. Now teaching nursing at Chesapeake College in Wye Mills, MD, she says: “As a single parent, Project RN helped me tremendously. I didn’t have to pick up extra shifts at work and could concentrate on my studies.”
Addressing Critical Nursing Needs

The United States is facing a critical shortage of registered nurses and cannot meet health care needs. CareFirst is working to change that.

60,000+

ONE CHALLENGE: SHORTAGE OF NURSE TRAINERS

A vibrant nursing workforce requires enough professors to train them.

The U.S. Department of Health & Human Services projects that by 2020 demand for nurses will increase 40%, but the supply of nurses is projected to grow only 6%.

SUPPORTING COMMUNITY EFFORTS TO TRAIN NEW NURSES

CareFirst is committed to increasing the number of nursing school teaching faculty and introducing innovations that improve nursing schools' capacity to enroll and graduate more students.

Project RN
Scholarship funding for nurses seeking advanced degrees to become nurse educators throughout Washington, DC, Northern Virginia and Maryland.

“Who Will Care?” Initiative
CareFirst has contributed $1.5 million to the Maryland Hospital Association’s “Who Will Care?” initiative focused on doubling the number of Registered Nurses in the state.

Nursing Simulation Labs
CareFirst has provided funding for simulator labs at 12 colleges and universities to help provide “hands-on” experiences for nurses in training.

In some portions of CareFirst’s mid-Atlantic service area, a lack of qualified providers makes it difficult for patients to obtain needed behavioral health care services. To address the growing need for behavioral health and substance use programs, CareFirst makes it a priority to fund programs that expand access and provide support, with clinical oversight, for underserved urban and rural areas.

CareFirst has invested in a variety of behavioral health and substance use programs across our region. Examples of the types of programs we support include therapeutic afterschool care for children in need of behavioral health services; substance use programs that provide counseling and medication-assisted treatment; and programs that expand access to care for patients upon being discharged from the hospital. In addition to supporting community-based programs, we look for innovative ways to expand access to care, especially in areas where health care is not readily accessible.

To expand access to care in underserved areas, CareFirst announced in 2013 an investment of $1.5 million over three years to assist health care providers in expanding their use of telemedicine for behavioral health care. CareFirst worked with community health centers, nonprofit organizations and public health entities in Maryland, Washington DC, and Northern Virginia to help build upon existing programs or implement new initiatives that expand behavioral health services through telemedicine.

The programs CareFirst funded through its telemedicine grants have helped nearly 1,300 children and adults who suffer from autism, substance use and other behavioral health disorders receive much needed treatment. Each program uses telecommunication technology – including video-conferencing, telephone and other electronic communications – to give health care providers the ability to assess, diagnose, treat and educate patients remotely.

**Behavioral Health Telemedicine Grant Recipients**
- Atlantic General Hospital
- Catholic Charities of Baltimore
- La Clinica del Pueblo
- Sheppard Pratt Health System

Using telemedicine technology, Dr. Ben Borja, director of medical crisis services with Sheppard Pratt Health System, and his colleagues have provided patients of federally qualified health centers in Worcester, Somerset, Garrett, Cecil, Caroline and Dorchester counties with access behavioral health care.

The programs CareFirst funded through its telemedicine grants have helped nearly 1,300 children and adults receive much needed treatment.
Addressing the Growing Need

Behavioral health disorders affect millions of people across our country. Additionally, our nation is facing an addiction epidemic. Fighting this epidemic is complicated by the social stigmas associated with substance use and in some areas a shortage of providers. To this end, CareFirst makes it a priority to invest in community-based programs that serve the overall health care needs of their communities.

Quick Take

<tr>
<td>The Maryland Community Health Initiative (Penn North) offers substance use treatment and comprehensive case management services to members of Baltimore’s Sandtown-Winchester community. 13,500 people have received substance use and treatment services through this program.</td>
<td>The Woman’s Center Mental Health Counseling program offers outcomes-based therapy for the uninsured and underinsured in Fairfax County, Va. Their fee schedule, which is a sliding scale, helps provide high-quality care at a lower cost.</td>
<td>Northern Virginia Family Service’s Multicultural Center provides a variety of behavioral health and case management services to immigrants who have suffered from the effects of torture, war, civil strife and domestic violence.</td>
</tr>
</tbody>
</table>
Throughout the region, CareFirst supports the work of organizations seeking innovative and sustainable approaches to improving health care and quality of life.
CareFirst is committed to upholding its non-profit mission and contributed more than $43 million in 2016 to community initiatives designed to increase the accessibility, affordability, safety and quality of health care services throughout Maryland, Washington, DC and Northern Virginia.

Areas of Giving
In priority order, CareFirst contributions go toward:

- **Subsidies and Enhanced Health Care Access Programs**
  Support for city and state programs which provide access for large vulnerable populations – those unable to otherwise receive health care services or have only limited access to those services. This represents the largest portion of our giving budget.

- **Catalytic Giving**
  Support for programs and other initiatives that stimulate productive change and improvements in the care system over the long term.

- **Targeted Health Related Giving Through Others**
  Support to organizations that provide direct health care or related services for the underserved.

- **Programmatic Initiatives**
  Program support which targets a specific population and/or addresses a major health care issue, with specific measurements for success.

- **Corporate Memberships and Community Sponsorships**
  CareFirst funds certain opportunities related to corporate sponsorships and memberships with health and business/civic organizations in order to build strong relationships and develop visible partnerships with the community. This represents the smallest portion of our giving budget.

Each year we establish a budget to support the health care needs and priorities of the communities we serve in Washington, DC, Maryland, and Northern Virginia with an overarching goal of dedicating resources to initiatives that catalyze change and create systemic efficiencies in the health care delivery system.

CareFirst is committed to supporting our region’s social wellbeing. To do so, we have developed long-standing community partnerships, are committed to diversity and inclusion, and strive to maintain the highest ethical standards.

Each year since 2013, CareFirst has been named by the Ethisphere Institute as one of the “World’s Most Ethical Companies.” Ethisphere recognized CareFirst for its corporate culture, business integrity and industry leadership in accountability, transparency and corporate social responsibility.

INVESTING IN OUR COMMUNITY
Developing strong philanthropic partnerships that improve health care for the vulnerable and underserved in our region is core to our mission. Since 2011, CareFirst has been named as a leading corporate philanthropist by the Baltimore Business Journal, topping the publication’s annual list in 2011, 2013, 2014, and 2015. CareFirst also has been among the top 10 on the Washington Business Journal’s list for the past 10 years.

HELPING OUR COMMUNITIES GROW
Our employees are committed to serving in communities where they work and live. Every year, our employees dedicate their time and talents to volunteering with a diverse set of non-profit organizations.

In 2016, CareFirst associates volunteered 18,430 hours supporting nonprofit organizations in Maryland, Washington, DC and Northern Virginia. We also support annual, company-wide initiatives including an associate walk fundraising campaign, and the CareFirst United Way Campaign. In addition, CareFirst matches grants by associates to health focused nonprofit organizations.

EMBRACING DIVERSITY AND INCLUSION
As a company, we understand that having a culturally diverse workforce that is reflective of the communities we serve is important to our success. CareFirst fosters an inclusive environment where our employees can strive to do their best and reach their fullest potential.

To support inclusivity amongst our associates, we offer a range of Associate Resource Groups (ARGs). These voluntary groups are self-managed and provide leadership, mentorship and networking opportunities for associates at all levels of the organization. CareFirst currently has seven ARGs: Asian, Black Professionals Network, Hispanic, Millennial, Military/Veteran, PROPride, and Wellness, with plans to add additional groups in the coming years.
WE CARE ABOUT THE ENVIRONMENT
CareFirst strives to improve its environmental footprint by reducing dependence on paper encouraging the use of environmentally-friendly materials and practices in the construction and build-out of leased office space and in the operation of our business. In many of our locations, steps have been taken to reduce energy usage by installing light sensors, upgrading light fixtures to be energy efficient and mercury free, utilizing geothermal energy where possible, and upgrading cooling units to improve efficiency.
To provide associates with alternatives to commuting to work, CareFirst has installed bike racks at various locations, improved alternative work arrangements (including telecommuting), reimbursed public transportation expenses, offered shuttle services between select office locations and public transportation hubs, and installed electric vehicle charging stations in onsite garages.

Each year since 2013, CareFirst has been named by the Ethisphere Institute as one of the “World’s Most Ethical Companies”

CareFirst has long been committed to promoting a culture of tolerance, acceptance and diversity in the workplace. The company has recently earned the following recognitions:

**Human Rights Campaign**
Scored 100 percent on the organization’s 2017 Corporate Equality Index and recognition as one of the Best Places to work for LGBTQ Equality.

**WorldatWork**
2017 Seal of Distinction for creating a positive work environment.

**The Chesapeake Human Resources Association**
2017 James W. Rouse Diversity Award for our demonstrated commitment to a diverse and inclusive workplace.
