Exclusion Criteria
Required Medical Information

For primary hypogonadism or hypogonadotropic hypogonadism, initial therapy: The patient has at least two confirmed low morning serum total testosterone concentrations based on the reference laboratory range or current practice guidelines [Note: Safety and efficacy of testosterone products in patients with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established.]. For primary hypogonadism or hypogonadotropic hypogonadism, continuation of therapy: The patient had a confirmed low morning serum total testosterone concentration based on the reference laboratory range or current practice guidelines before starting testosterone therapy [Note: Safety and efficacy of testosterone products in patients with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established.]. For gender dysphoria, the patient is able to make an informed decision to engage in hormone therapy.

AVSOLA

All FDA-approved Indications, Some Medically-accepted Indications Behcet's syndrome, hidradenitis suppurativa, juvenile idiopathic arthritis, pyoderma gangrenosum, sarcoidosis, Takayasu's arteritis, uveitis.

Exclusion Criteria Required Medical Information

For moderately to severely active rheumatoid arthritis (new starts only): 1) Pt meets ANY of the following: a) requested drug will be used in combination with methotrexate (MTX) or leflunomide OR b) intolerance or contraindication to MTX AND leflunomide, AND 2) Pt meets ANY of the following: a) inadequate treatment response, intolerance or contraindication to MTX OR b) inadequate treatment response or intolerance to a prior biologic disease-modifying antirheumatic drug (DMARD) or a targeted synthetic DMARD. For active ankylosing spondylitis (new starts only): an inadequate treatment response or intolerance to a non-steroidal anti-inflammatory drug (NSAID) OR contraindication that would prohibit a trial of NSAIDs. For moderate to severe plaque psoriasis (new starts only): 1) At least 3% of body surface area (BSA) is affected OR crucial body areas (e.g., feet, hands, face, neck, groin, intertriginous areas) are affected at time of diagnosis, AND 2) Pt meets ANY of the following: a) Pt has experienced inadequate treatment response or intolerance to either phototherapy (e.g., UVB, PUVA) or pharmacologic treatment with MTX, cyclosporine, or acitretin, OR b) pharmacologic treatment with MTX, cyclosporine, or acitretin is contraindicated, OR c) Pt has severe psoriasis that warrants a biologic as first-line therapy (i.e., at least 10% of BSA or crucial body areas [e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas] are affected).

Age Restrictions **Prescriber Restrictions Coverage Duration** Other Criteria

AVSOLA

Plan Year

For hidradenitis suppurativa (new starts only): Pt has severe, refractory disease. For uveitis (new starts only): Inadequate treatment response or intolerance or has a contraindication to a trial of immunosuppressive therapy for uveitis. For all indications: The patient experienced an intolerable adverse event to Renflexis and that adverse event was NOT attributed to the active ingredient as described in the prescribing information.

Drug Names AYVAKIT

PA Indication Indicator All FDA-approved Indications, Some Medically-accepted Indications

Myeloid and lymphoid neoplasms with eosinophilia, gastrointestinal stromal tumor (GIST) for residual, unresectable, tumor rupture, or recurrent/metastatic disease without platelet-derived growth factor receptor alpha (PDGFRA) exon 18 mutation.

Exclusion Criteria -

Off-label Uses

Required Medical Information For myeloid and lymphoid neoplasms with eosinophilia, the patient meets all of the

following criteria: 1) The disease is FIP1L1- PDGFRA rearrangement-positive, AND 2) The disease harbors a PDGFRA D842V mutation, AND 3) The disease is resistant to imatinib. For GIST, the patient meets either of the following criteria: 1) The disease harbors PDGFRA exon 18 mutation, including a PDGFRA D842V mutation, OR 2) The requested drug will be used after failure on at least two Food and Drug Administration (FDA)-approved therapies in residual, unresectable, tumor rupture, or recurrent/metastatic disease without PDGFRA exon 18 mutation. For systemic

mastocytosis: 1) The patient has a diagnosis of indolent systemic mastocytosis or advanced systemic mastocytosis (including aggressive systemic mastocytosis [ASM], systemic mastocytosis with associated hematological neoplasm [SM-AHN], and mast cell leukemia [MCL]) AND 2) The patient has a platelet count of greater than or equal to

50,000/microliter (mcL).

All FDA-approved Indications

For atopic dermatitis (AD), initial therapy: 1) Patient has moderate-to-severe disease, AND 2) Patient has had an inadequate treatment response to either a topical corticosteroid or a topical calcineurin inhibitor. OR topical corticosteroids and topical calcineurin inhibitors are not advisable for the patient. For AD, continuation of therapy: Patient achieved or maintained positive clinical response. For oral corticosteroid dependent asthma, initial therapy: Patient has inadequate asthma control despite current treatment with both of the following medications: 1) High-dose inhaled corticosteroid AND 2) Additional controller (i.e., long acting beta2-agonist (LABA), long-acting muscarinic antagonist (LAMA), leukotriene modifier, or sustained-release theophylline) unless patient has an intolerance or contraindication to such therapies. For moderate-to-severe asthma, initial therapy: Patient has a baseline blood eosinophil count of at least 150 cells per microliter and their asthma remains inadequately controlled despite current treatment with both of the following medications: 1) Medium-to-high-dose inhaled corticosteroid, AND 2) Additional controller (i.e., LABA, LAMA, leukotriene modifier, or sustained-release theophylline) unless patient has an intolerance or contraindication to such therapies. For asthma, continuation of therapy: Asthma control has improved on treatment with the requested drug, as demonstrated by a reduction in the frequency and/or severity of symptoms and exacerbations or a reduction in the daily maintenance oral corticosteroid dose. For chronic rhinosinusitis with nasal polyposis (CRSwNP): 1) The requested drug is used as add-on maintenance treatment, AND 2) For 18 years of age or older, patient has experienced an inadequate treatment response to Xhance (fluticasone).

FORTEO

FORTEO, TERIPARATIDE
All FDA-approved Indications

-

For postmenopausal osteoporosis: patient has ONE of the following: 1) history of fragility fracture, OR 2) pre-treatment T-score of less than or equal to -2.5 or pre-treatment T-score greater than -2.5 and less than -1 with a high pre-treatment Fracture Risk Assessment Tool (FRAX) fracture probability AND patient has ANY of the

following: a) indicators for higher fracture risk (e.g., advanced age, frailty, glucocorticoid therapy, very low T-scores, or increased fall risk), OR b) patient has failed prior treatment with or is intolerant to a previous injectable osteoporosis therapy OR c) patient has had an oral bisphosphonate trial of at least 1-year duration or there is a clinical reason to avoid treatment with an oral bisphosphonate. For primary or hypogonadal osteoporosis in men: patient has ONE of the following: 1) history of osteoporotic vertebral or hip fracture, OR 2) pre-treatment T-score of less than or equal to -2.5, or pre-treatment T-score greater than -2.5 and less than -1 with a high pre-treatment FRAX fracture probability AND patient has ANY of the following: a) patient has failed prior treatment with or is intolerant to a previous injectable osteoporosis therapy, OR b) patient has had an oral bisphosphonate trial of at least

1-year duration or there is a clinical reason to avoid treatment with an oral bisphosphonate. For glucocorticoid-induced osteoporosis: patient has had an oral bisphosphonate trial of at least 1-year duration unless patient has a contraindication or intolerance to an oral bisphosphonate, AND patient meets ANY of the following: 1) patient has a history of fragility fracture, OR 2) pre-treatment T-score of less than or equal to -2.5, OR 3) pre-treatment T-score greater than -2.5 and less than -1 with a

high pre-treatment FRAX fracture probability.

Age Restrictions
Prescriber Restrictions
Coverage Duration
Other Criteria

Initial: 24 months, Continuation: Plan Year

Continuation of therapy: If the patient has received greater than or equal to 24 months of therapy with any parathyroid hormone analog: 1) The patient remains at or has returned to having a high risk for fracture, AND 2) The benefit of therapy with this prescribed medication outweighs the potential risks for this patient. Patient has high FRAX fracture probability if the 10-year probability is either greater than or equal to 20 percent for any major osteoporotic fracture or greater than or equal to 3 percent for hip fracture. If glucocorticoid treatment is greater than 7.5 mg (prednisone equivalent) per day, the estimated risk score generated with FRAX should be multiplied by 1.15 for major osteoporotic fracture and 1.2 for hip fracture.

Exclusion Criteria Required Medical Information **INFLECTRA INFLECTRA**

All FDA-approved Indications, Some Medically-accepted Indications Behcet's syndrome, hidradenitis suppurativa, juvenile idiopathic arthritis, pyoderma gangrenosum, sarcoidosis, Takayasu's arteritis, uveitis.

For moderately to severely active rheumatoid arthritis (new starts only): 1) Pt meets ANY of the following: a) requested drug will be used in combination with methotrexate (MTX) or leflunomide OR b) intolerance or contraindication to MTX AND leflunomide, AND 2) Pt meets ANY of the following: a) inadequate treatment response, intolerance or contraindication to MTX OR b) inadequate treatment response or intolerance to a prior biologic disease-modifying antirheumatic drug (DMARD) or a targeted synthetic DMARD. For active ankylosing spondylitis (new starts only): an inadequate treatment response or intolerance to a non-steroidal anti-inflammatory drug (NSAID) OR contraindication that would prohibit a trial of NSAIDs. For moderate to severe plague psoriasis (new starts only): 1) At least 3% of body surface area (BSA) is affected OR crucial body areas (e.g., feet, hands, face, neck, groin, intertriginous areas) are affected at time of diagnosis, AND 2) Pt meets ANY of the following: a) Pt has experienced inadequate treatment response or intolerance to either phototherapy (e.g., UVB, PUVA) or pharmacologic treatment with MTX, cyclosporine, or acitretin, OR b) pharmacologic treatment with MTX, cyclosporine, or acitretin is contraindicated, OR c) Pt has severe psoriasis that warrants a biologic as first-line therapy (i.e., at least 10% of BSA or crucial body areas [e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas] are affected).

Age Restrictions **Prescriber Restrictions Coverage Duration** Other Criteria

Plan Year

For hidradenitis suppurativa (new starts only): Pt has severe, refractory disease. For uveitis (new starts only): Inadequate treatment response or intolerance or has a contraindication to a trial of immunosuppressive therapy for uveitis. For all indications: The patient experienced an intolerable adverse event to Renflexis and that adverse event was NOT attributed to the active ingredient as described in the prescribing information.

OGIVRI OGIVRI

All FDA-approved Indications, Some Medically-accepted Indications
Neoadjuvant treatment for human epidermal growth factor receptor 2 (HER2)-positive
breast cancer, recurrent or advanced unresectable HER2-positive breast cancer,
leptomeningeal metastases from HER2-positive breast cancer, brain metastases from
HER2-positive breast cancer, HER2-positive esophageal and esophagogastric junction
adenocarcinoma, HER2-positive advanced, recurrent, or metastatic uterine serous
carcinoma, HER2-amplified and RAS and BRAF wild-type colorectal cancer (including
appendiceal adenocarcinoma), HER2-positive recurrent salivary gland tumor,
HER2-positive unresectable or metastatic hepatobiliary carcinoma (gallbladder cancer,
intrahepatic cholangiocarcinoma, extrahepatic cholangiocarcinoma), HER2
overexpression positive locally advanced, unresectable, or recurrent gastric
adenocarcinoma, HER2-positive endometrial cancer.

Exclusion Criteria
Required Medical Information

All indications: the patient had an intolerable adverse event to Trazimera and that adverse event was NOT attributed to the active ingredient as described in the prescribing information. For colorectal cancer (including appendiceal adenocarcinoma): 1) the disease is HER2-amplified and RAS and BRAF wild-type and 2) the requested drug is used in combination with pertuzumab, tucatinib or lapatinib and 3) the patient has not had previous treatment with a HER2 inhibitor. For hepatobiliary carcinoma: 1) the disease is HER2-positive AND 2) the requested drug is used in combination with pertuzumab. For endometrial cancer: 1) the disease is HER2-positive AND 2) the requested drug is used in combination with paclitaxel and continued as a single agent for maintenance therapy.

Required Medical Information

For excessive daytime sleepiness associated with narcolepsy, initial request: 1) The diagnosis has been confirmed by sleep lab evaluation, AND 2) The patient has experienced an inadequate treatment response or intolerance to at least one central nervous system (CNS) wakefulness promoting drug (e.g., armodafinil, modafinil), OR has a contraindication that would prohibit a trial of central nervous system (CNS) wakefulness promoting drugs (e.g., armodafinil, modafinil). For excessive daytime sleepiness associated with obstructive sleep apnea (OSA), initial request: 1) The diagnosis has been confirmed by polysomnography, AND 2) The patient has experienced an inadequate treatment response or intolerance to at least one central nervous system (CNS) wakefulness promoting drug (e.g., armodafinil, modafinil), OR has a contraindication that would prohibit a trial of central nervous system (CNS) wakefulness promoting drugs (e.g., armodafinil, modafinil). If the request is for a continuation of therapy, then the patient experienced a decrease in daytime sleepiness with narcolepsy or a decrease in daytime sleepiness with obstructive sleep apnea (OSA).

TERIPARATIDE TERIPARATIDE

For postmenopausal osteoporosis: patient has ONE of the following: 1) history of fragility fracture, OR 2) pre-treatment T-score of less than or equal to -2.5 or pre-treatment T-score greater than -2.5 and less than -1 with a high pre-treatment Fracture Risk Assessment Tool (FRAX) fracture probability AND patient has ANY of the following: a) indicators for higher fracture risk (e.g., advanced age, frailty, glucocorticoid therapy, very low T-scores, or increased fall risk). OR b) patient has failed prior treatment with or is intolerant to a previous injectable osteoporosis therapy OR c) patient has had an oral bisphosphonate trial of at least 1-year duration or there is a clinical reason to avoid treatment with an oral bisphosphonate. For primary or hypogonadal osteoporosis in men: patient has ONE of the following: 1) history of osteoporotic vertebral or hip fracture, OR 2) pre-treatment T-score of less than or equal to -2.5, or pre-treatment T-score greater than -2.5 and less than -1 with a high pre-treatment FRAX fracture probability AND patient has ANY of the following: a) patient has failed prior treatment with or is intolerant to a previous injectable osteoporosis therapy, OR b) patient has had an oral bisphosphonate trial of at least 1-year duration or there is a clinical reason to avoid treatment with an oral bisphosphonate. For glucocorticoid-induced osteoporosis: patient has had an oral bisphosphonate trial of at least 1-year duration unless patient has a contraindication or intolerance to an oral bisphosphonate, AND patient meets ANY of the following: 1) patient has a history of fragility fracture, OR 2) pre-treatment T-score of less than or equal to -2.5, OR 3) pre-treatment T-score greater than -2.5 and less than -1 with a high pre-treatment FRAX fracture probability.

Age Restrictions **Prescriber Restrictions Coverage Duration** Other Criteria

Initial: 24 months, Continuation: Plan Year

Continuation of therapy: If the patient has received greater than or equal to 24 months of therapy with any parathyroid hormone analog: 1) The patient remains at or has returned to having a high risk for fracture, AND 2) The benefit of therapy with this prescribed medication outweighs the potential risks for this patient. Patient has high FRAX fracture probability if the 10-year probability is either greater than or equal to 20 percent for any major osteoporotic fracture or greater than or equal to 3 percent for hip fracture. If glucocorticoid treatment is greater than 7.5 mg (prednisone equivalent) per day, the estimated risk score generated with FRAX should be multiplied by 1.15 for major osteoporotic fracture and 1.2 for hip fracture.

Drug NamesBUDESONIDE ER, UCERISPA Indication IndicatorAll FDA-approved Indications

Off-label Uses -Exclusion Criteria -

Required Medical Information For the induction of remission of active, mild to moderate ulcerative colitis: patient has

experienced an inadequate treatment response, intolerance, or has a contraindication

to at least one 5-aminosalicylic acid (5-ASA) therapy.

Age Restrictions -

Prescriber Restrictions -

Coverage Duration 2 months

Other Criteria -

Prior Authorization Group UDENYCA

Drug Names UDENYCA, UDENYCA ONBODY

PA Indication Indicator All FDA-approved Indications, Some Medically-accepted Indications

Off-label Uses Stem cell transplantation-related indications

Exclusion Criteria -

Required Medical Information If receiving chemotherapy, the requested drug will be administered at least 24 hours

after chemotherapy. For prophylaxis of myelosuppressive chemotherapy-induced febrile neutropenia: the patient must meet both of the following: 1) Patient has a solid tumor or non-myeloid cancer, AND 2) Patient is currently receiving or will be receiving

treatment with myelosuppressive anti-cancer therapy.

Age Restrictions - Prescriber Restrictions -

Coverage Duration 6 months

Other Criteria -

Prior Authorization Group ULTOMIRIS
Drug Names ULTOMIRIS

PA Indication Indicator All FDA-approved Indications

Off-label Uses - Exclusion Criteria -

Required Medical Information

For paroxysmal nocturnal hemoglobinuria (PNH), initial: 1) Diagnosis of PNH was confirmed by detecting a deficiency of glycosylphosphatidylinositol-anchored proteins (GPI-APs) AND 2) Flow cytometry is used to demonstrate GPI-AP deficiency. For PNH, continuation: 1) There is no evidence of unacceptable toxicity or disease progression while on the current regimen AND 2) Patient has demonstrated a positive response to therapy. For atypical hemolytic uremic syndrome (aHUS), initial: Disease is not caused by Shiga toxin-producing Escherichia coli. For aHUS, continuation: 1) There is no evidence of unacceptable toxicity or disease progression while on the current regimen AND 2) Patient has demonstrated a positive response to therapy. For generalized myasthenia gravis (gMG), continuation: 1) There is no evidence of unacceptable toxicity or disease progression while on the current regimen AND 2) Patient has demonstrated a positive response to therapy. For neuromyelitis optica spectrum disorder (continuation): 1) there is no evidence of unacceptable toxicity or disease progression while on the current regimen AND 2) the pt has demonstrated a positive response to therapy.

Off-label Uses Recurrent non-small cell lung cancer (NSCLC), NSCLC with high-level MET

amplification or MET exon 14 skipping mutation, symptomatic or relapsed/refractory anaplastic lymphoma kinase (ALK)-fusion positive Erdheim-Chester Disease, symptomatic or relapsed/refractory (ALK)-fusion positive Rosai-Dorfman Disease, (ALK)-fusion positive Langerhans Cell Histiocytosis, metastatic or unresectable ROS1

gene fusion positive cutaneous melanoma.

Exclusion Criteria

Required Medical Information For non-small cell lung cancer (NSCLC), the requested drug is used in any of the

following settings: 1) the patient has recurrent, advanced or metastatic anaplastic lymphoma kinase (ALK)-positive NSCLC AND 2) the patient has experienced an inadequate treatment response, intolerance, or has a contraindication to ONE of the following products: Alecensa (alectinib) or Alunbrig (brigatinib), OR 3) the patient has recurrent, advanced or metastatic ROS-1 positive NSCLC, OR 4) the patient has NSCLC with high-level MET amplification or MET exon 14 skipping mutation. For inflammatory myofibroblastic tumor (IMT), the disease is ALK-positive. For anaplastic large cell lymphoma (ALCL): 1) the disease is relapsed or refractory, AND 2) the

disease is ALK-positive.

For moderate to severe persistent asthma, initial therapy (tx): 1) Patient (pt) has a positive skin test (or blood test) to at least one perennial aeroallergen, 2) Pt has baseline immunoglobulin E (IgE) level greater than or equal to 30 international units per milliliter (IU/mL), AND 3) Pt has inadequate asthma control despite current tx with both of the following medications: a) Medium-to-high-dose inhaled corticosteroid, AND b) Additional controller (i.e., long acting beta2-agonist, long-acting muscarinic antagonist, leukotriene modifier, or sustained-release theophylline) unless pt has an intolerance or contraindication to such therapies. For moderate to severe persistent asthma, continuation of tx (COT): Asthma control has improved on treatment with the requested drug, as demonstrated by a reduction in the frequency and/or severity of symptoms (sx) and exacerbations or a reduction in the daily maintenance oral corticosteroid dose. For chronic spontaneous urticaria (CSU), initial tx: 1) Pt has been evaluated for other causes of urticaria, including bradykinin-related angioedema and interleukin-1 (IL-1)-associated urticarial syndromes (e.g., auto-inflammatory disorders, urticarial vasculitis), 2) Pt has experienced a spontaneous onset of wheals, angioedema, or both, for at least 6 weeks, AND 3) Pt remains symptomatic despite H1 antihistamine treatment. For CSU, COT: Pt has experienced a benefit (e.g., improved sx) since initiation of tx. For chronic rhinosinusitis with nasal polyps (CRSwNP): 1) The requested drug is used as add-on maintenance treatment. AND 2) Pt has experienced inadequate treatment response to Xhance (fluticasone). For IgE-mediated food allergy, initial tx: Pt has baseline IgE level greater than or equal to 30 IU/mL. For IgE-mediated food allergy, COT: Pt has experienced a benefit as evidenced by a decrease in hypersensitivity (e.g., moderate to severe skin, respiratory or gastrointestinal sx) to food allergen.

Required Medical Information For chronic lymphocytic leukemia (CLL)/small lymphocytic lymphoma (SLL): the

requested drug is used as second-line or subsequent therapy.

Age Restrictions - Prescriber Restrictions -

Coverage Duration Plan Year

Other Criteria -

Prior Authorization Group ZYKADIA
Prug Names ZYKADIA

PA Indication Indicator All FDA-approved Indications, Some Medically-accepted Indications

Off-label Uses

Recurrent anaplastic lymphoma kinase (ALK)-positive non-small cell lung cancer
(NSCLC), recurrent, advanced, or metastatic ROS1-positive NSCLC, Erdheim-Chester
Disease (ECD) with ALK-fusion, inflammatory myofibroblastic tumor (IMT), brain
metastases from NSCLC, relapsed or refractory ALK-positive anaplastic large cell

lymphoma (ALCL)

Exclusion Criteria -

Required Medical Information For non-small cell lung cancer (NSCLC): 1) the patient has recurrent, advanced, or

metastatic anaplastic lymphoma kinase (ALK)-positive AND 2) the patient has

experienced an inadequate treatment response, intolerance, or has a contraindication to ONE of the following products: Alecensa (alectinib) or Alunbrig (brigatinib) OR 3) ROS1-positive disease. For inflammatory myofibroblastic tumor: the disease is ALK-positive. For brain metastases from NSCLC: the patient has ALK-positive NSCLC.

For anaplastic large cell lymphoma (ALCL): the patient has relapsed or refractory

ALK-positive disease.
